ID-Fix indicator discs

ASSIGN, STATUS, CONTROL

OCCUPATIONAL SAFETY

DUE TO CLEAR ASSIGNMENT OF THE VALVE
Through clear house number assignment, the ID-Fix indicator disc shows both in-house employees and external users (e.g. the fire service) to which house/building the respective connection leads.

STATUS DISPLAY

OF THE VALVE – OK/NOT OK
The status display patchboard shows at a glance whether the valve is operable or not. Simply click the red patchboard to directly indicate inspection work.

CONTROL FUNCTION

THROUGH ANNUALLY CHANGING DISC COLOUR
Periodic inspection and maintenance work can be controlled with the help of the annually changing disc colour. Turn the disc – attach new disc – return old disc to the water supervisor – clearly documented!

INDIVIDUALLY ADAPTABLE

FOR CUSTOMER-SPECIFIC INFORMATION
In addition to the standard functions, the ID-Fix indicator disc offers individually adaptable fields. Customer-specific information can be displayed using clip-on letters or printed stickers.

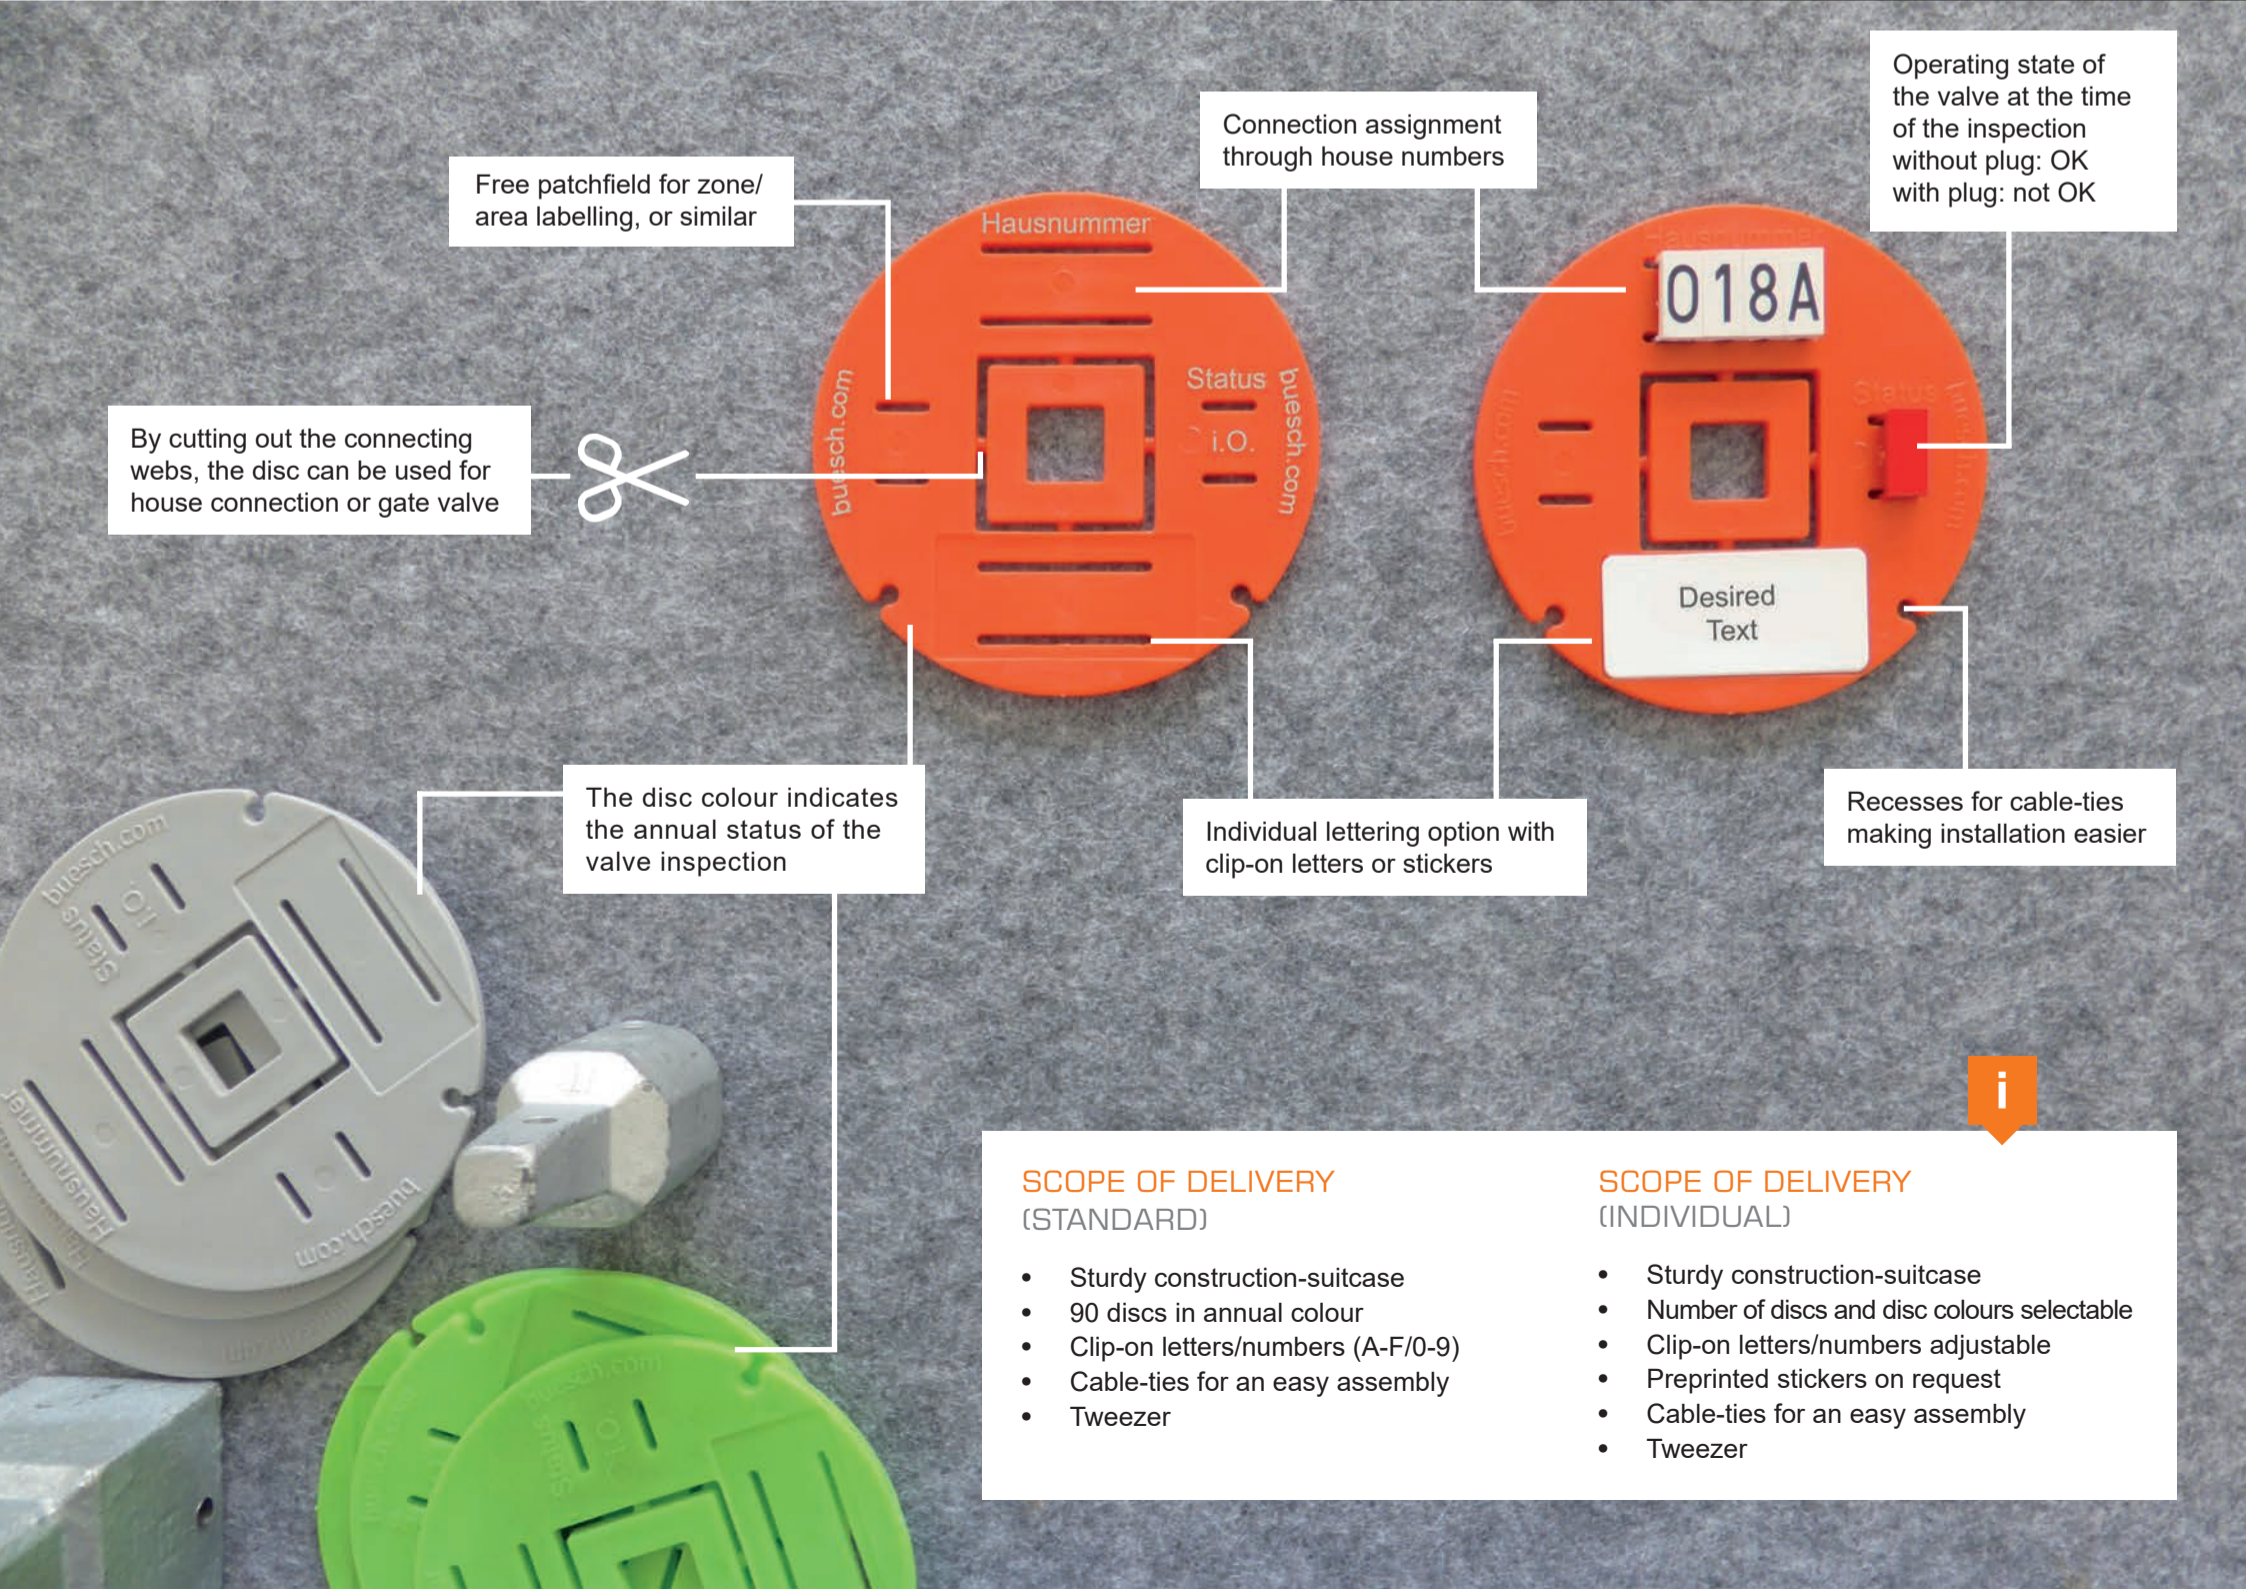

APPLICATION EXAMPLE

Easy assignment to house connection

Additional information sticker „Hydrant“

Free patchfield for zone/
area labelling, or similar

By cutting out the connecting
webs, the disc can be used for
house connection or gate valve

The disc colour indicates
the annual status of the
valve inspection

Connection assignment
through house numbers

Operating state of
the valve at the time of
the inspection
without plug: OK
with plug: not OK

Individual lettering option with
clip-on letters or stickers

Recesses for cable-ties
making installation easier
