

## Waterproof bearing plate

Modular Actuation System MAS

### Bearing plate

- Seals up to a pressure of 4 mWC
- As actuator bearing:
  - with stem square cap made of GGG40 (GJS-400-15) with street cap according to DIN 4056 size 1
  - when using position indicator mechanisms with street cap according to DIN 4056 size 2

### Material

- Stainless steel 1.4301 (304) / 1.4404 (316L) / each with a bronze bearing
- Sealing NBR

### Mounting

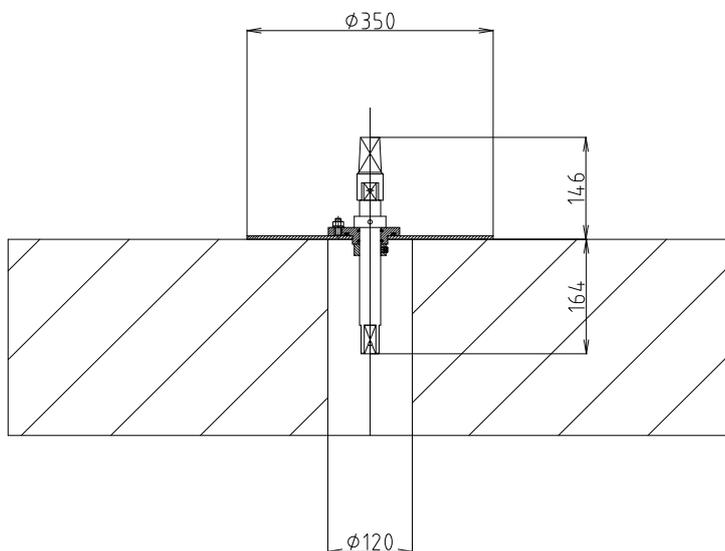

- Including fastening material for mounting on the shaft ceiling with square stem cap or position indicator

Waterproof bearing plate

Waterproof bearing plate with NBR sealing

Dimensions of the waterproof bearing plate

Bearing plate with stem square cap in street caps size 1

Bearing plate with position indicator in street cap size 2

| Size street cap | Material bearing | Material      | Material street cap |
|-----------------|------------------|---------------|---------------------|
| 1               | bronze           | 1.4301 (304)  | HDPE                |
|                 |                  | 1.4404 (316L) |                     |
| 2               |                  | 1.4301 (304)  | GG                  |
|                 |                  | 1.4404 (316L) |                     |

### YOUR ADVANTAGES

- **EASY INSTALLATION**  
Allows ideal installation of the drive rod
