

Ceiling bearing for grating made of stainless steel or steel

Modular Actuation System MAS

Ceiling bearing

- Bearing of drive rods on the grating above open basins
- Drive rod mounted in plastic bushings in the ceiling bearing
- Position indicator can be ideally fitted into the ceiling bearing

Material

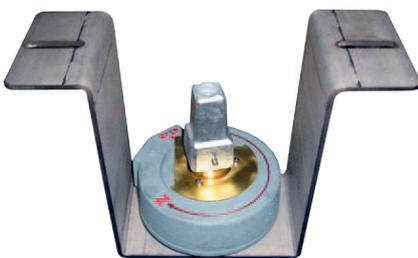

- Stainless steel 1.4301 (304) / 1.4404 (316L) / A36-hot-dip galvanized

Scope of supply

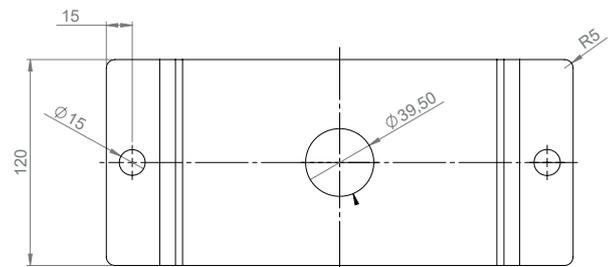

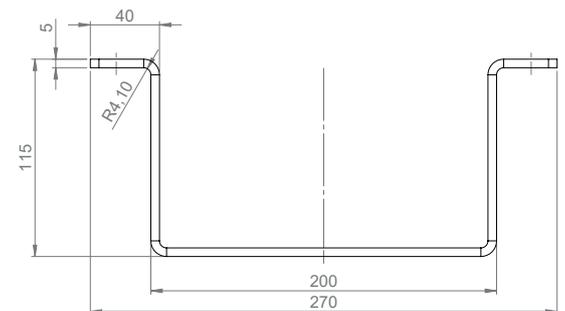

- Including installation material for mounting on the shaft ceiling

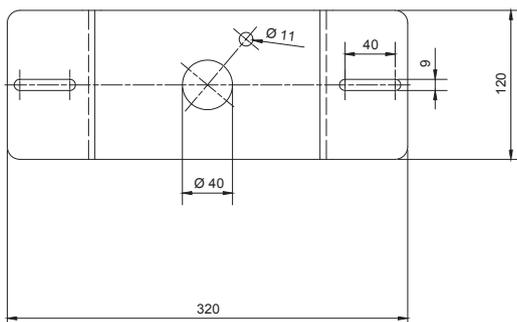

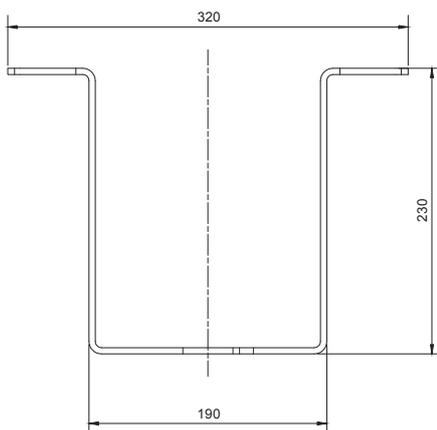

Usage example with square cap

Usage example with position indicator

Dimensioning of ceiling bearing for grating, for square caps or lockable attachment

Dimensions of ceiling bearing for grating for position indicator

YOUR ADVANTAGES

- **IDEAL MOUNTING**
For easy attachment at the grating
- **NO RISK OF STUMLING**
The stem square cap or the position indicator are kept low to prevent any risk of stumbling
