Components

Lock system for square cap mounted on a penstock

Locking plan can be created individually by different key colors of the padlocks.

Lock system for square cap mounted on a valve

Lock system for square cap mounted on an extension

YOUR ADVANTAGES

• SAFETY & PROTECTION

of the valve against unauthorised access

• SIMPLEST ASSEMBLY

Consisting of only two components and lockable with a standard padlock

• INDIVIDUAL LOCKING PLAN

With little effort, a clear and proven locking plan can be created when using multiple security locks - by using different key colors of the padlocks!
